

Data Analysis Torilo Academy | Charis Cohort

SQL Assessment Brief

Overview

This assessment focuses on writing SQL queries using basic clauses and logical operators. You will work with the Trendora Shopping Dataset, which you will download from Google Classroom and import into your MySQL environment.

Instructions

1. Download the Trendora Shopping Dataset from Google Classroom under the SQL Assessment post.
 2. Rename the downloaded file to **trendora** before importing.
 3. Import the file into a table named **trendora** inside the **charis** schema.
 4. Write your SQL queries in a single .sql file and clearly number each answer.
 5. Save your file as **Firstname_Lastname.sql** before submitting.
 6. Upload your completed .sql file to Google Classroom under the SQL Assessment assignment once you are done.
-

SQL Queries to Complete

SELECT + WHERE + COMPARISON/LOGICAL

1. Select all columns from the trendora table.
2. Select only the CustomerID, ItemPurchased, and PurchaseAmount(USD).
3. Retrieve all purchases with a PurchaseAmount greater than 60.
4. Retrieve all records where the Category is either 'Clothing' or 'Footwear'.
5. Retrieve all records where the Color is 'Gray' and the Size is 'M'.
6. Retrieve records where the PurchaseAmount is between 30 and 70.
7. Get all purchases made in the Spring or Summer seasons.
8. Find all purchases where the PaymentMethod is not 'Cash'.
9. Retrieve all female customers who bought items in the 'Clothing' category.
10. Retrieve all customers who used a promo code and got a discount greater than 0.

ORDER BY, LIMIT, OFFSET

1. List all purchases sorted by PurchaseAmount in descending order.

2. List the top 3 most expensive purchases.
 3. Show the 2 least expensive purchases.
 4. Display 5 records skipping the first 3 (use OFFSET).
 5. Retrieve the first 5 customers who used 'Express' shipping.
-

Submission

Upload your completed .sql file to Google Classroom under the SQL Assessment assignment. Ensure your file is named correctly as **Firstname_Lastname.sql** before uploading.
